

OFFICIAL COMMUNICATION 24 March 2020

COVID-19 EMERGENCY

We want to reassure all our Customers that the new restrictive measures adopted by the Government to protect public health, **allow us to guarantee the continuity of all our sampling**, studies, analysis and sample collection activities.

Our Laboratories operate daily in full compliance with all the parameters necessary to protect the health of our staff, customers and suppliers, according to the preventive measures established by the Government and published by the World Health Organization.

The following security measures are therefore active:

- Smart working
- Extension of work shifts to effectively manage the safety distances between operators
- Closure and/or limitation of access to all common areas
- Management of all meetings in videoconference mode
- Access restriction to the laboratories' buildings for the external personnel. Specific areas are identified and dedicated to the reception of materials and samples
- Intensification of the activities of cleaning, sanitation and ventilation in all structures

Our team is at your complete disposal **to identify "specific" solutions to any need.**

The Tentamus Group, thanks to a close interaction and synergy between all our Laboratories in the world, is, today more than ever, a guarantee of reliability and quality of services.

If you have any doubt or need any clarification, all our contacts remain active.
